

LIFEGUARD

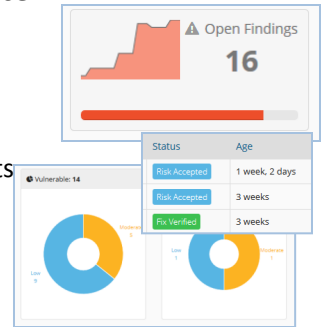

“Attackers test your systems every day! You should, too!!”

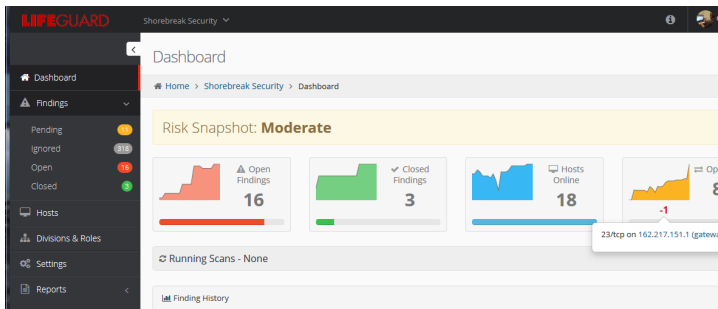

DISCOVER

Lifeguard™ is a comprehensive Vulnerability Management Service that allows you to discover, mitigate and manage your Business risk, powered by industry experts.

- Daily testing with the most current, threat signatures available
- Manual testing and validation of findings by our expert security analysts
- Automated notification and alerting
- Detailed description of security findings
- At-a-glance notification with history graphs and daily changes
- HTML Reports based on current findings
- Far exceeds static compliance frameworks

MITIGATE

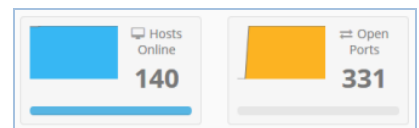

- Accept-risk or Remediate findings
- Manual validation of every remediated finding
- Track timelines and activity for each finding
- Discussion thread with analyst for each vulnerability
- Review open, closed and risk-accepted findings

MANAGE

- Risk awareness through intuitive web dashboard
- Graphic displays with highlighted changes
- Organize systems and users by physical or logical design; assign responsibilities to suit your organization
- Review trends and statistics over time

Up/Dn	Impact	IP Address	Hostname	Nickname	Division	Open Ports	Findings
